

NaProTECHNOLOGY—

A Catholic Approach to Fertility Issues

*Providing tools and insights to health care providers
and persons facing challenges during the reproductive years*

April 20, 7 pm — St. Vincent de Paul in Charlotte

Join us for a presentation on NaProTECHNOLOGY given by **Dr. Jillian Johnston** who is a Charlotte area Catholic and pro-life OBGYN about NaProTECHNOLOGY. NaProTECHNOLOGY (Natural Procreative Technology), IN LINE WITH CATHOLIC TEACHING, is a women's health science that monitors and maintains a woman's reproductive and gynecological health. It provides medical and surgical treatments that cooperate completely with the reproductive system.

Thirty years of scientific research in the study of normal and abnormal menstrual and fertility cycles have unraveled their mysteries..

Real Solutions to Real Problems

- Infertility
- Menstrual cramps
- Premenstrual syndrome (PMS)
- Ovarian cysts
- Irregular or abnormal bleeding
- Polycystic ovarian disease
- Repetitive miscarriage
- Postpartum depression
- Prematurity prevention
- Hormonal abnormalities
- Chronic discharges
- Other health problems

This is the first women's health science to network family planning with reproductive health monitoring and maintenance. It is a fertility-care based medical approach rather than a fertility-control approach to family planning and gynecological health.

**RSVP appreciated but not required. To RSVP please contact
Catholic Health Professionals of Charlotte: catholicealthcharlotte@gmail.com**

Light refreshments will be provided. Hope you can join us!

Co-sponsored by the Office of Family Life and Catholic Health Professionals of Charlotte.
